

Meet the ROBOTs.

They are here to help you understand or learn about the importance of online and e-safety. This means staying safe when using technology, such as computers or tablets.

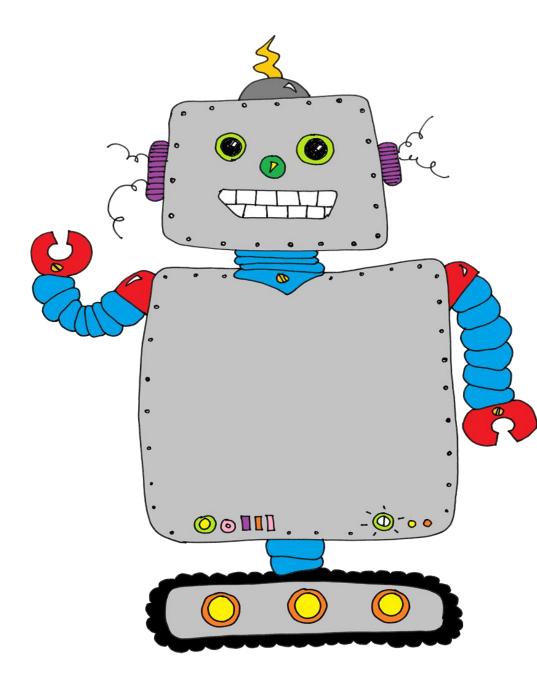

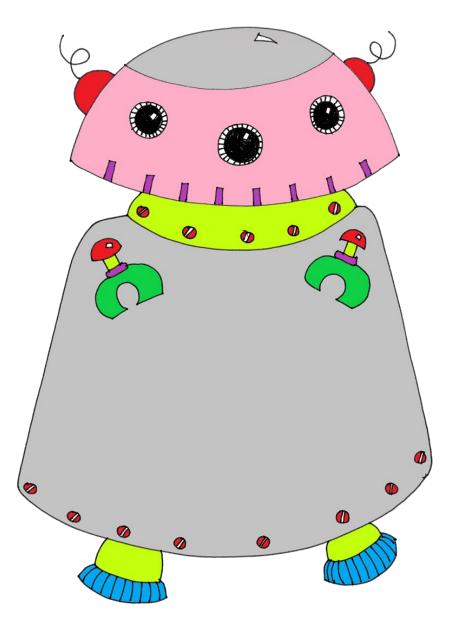

Ralph understands how important it is to stay safe on the internet. He is extremely sensible and knows who to trust and who to talk to when you become worried or concerned about something you see or hear on the internet.

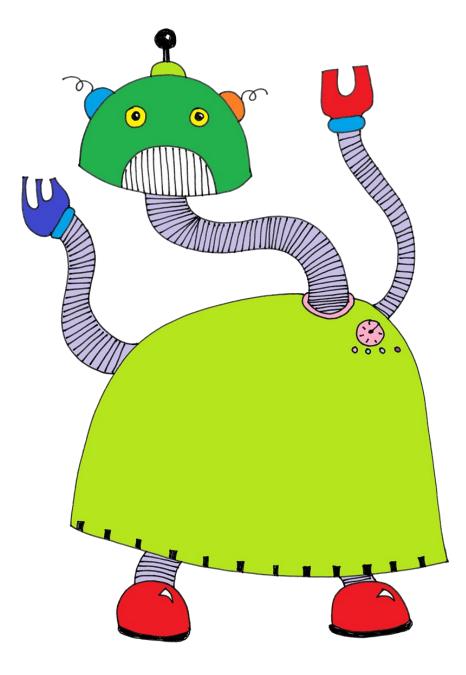

Oscar knows how important it is to feel protected on the internet. Oscar knows what information you should and should not share when using the internet. Oscar helps you protect yourself from the wrong people.

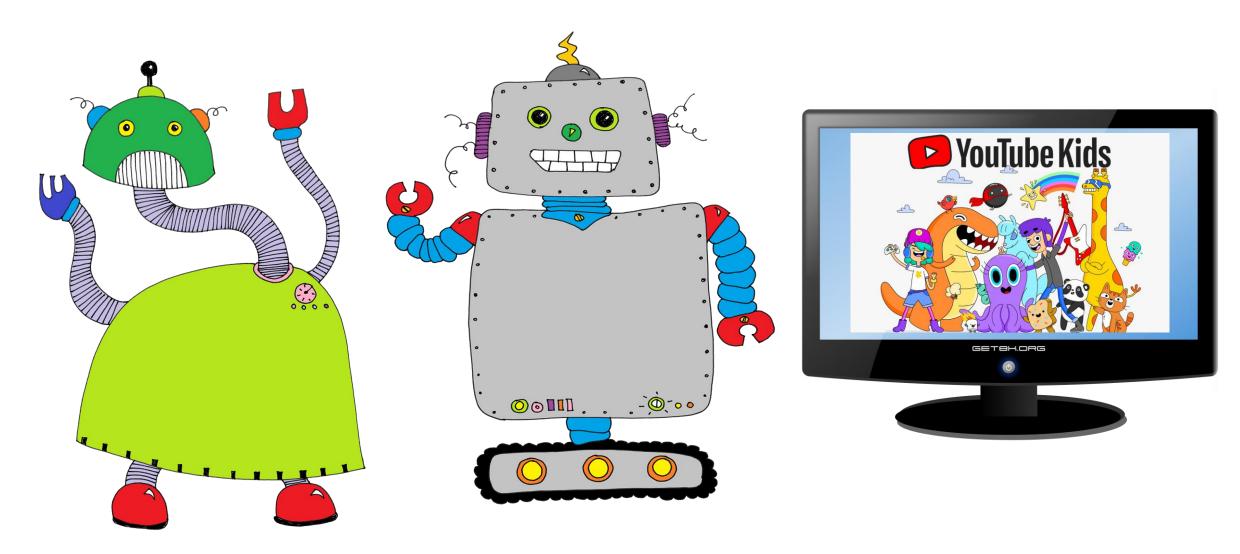

Betty is always polite and respectful to everyone she meets online. She knows how important it is to be kind and to respect other people's feelings.

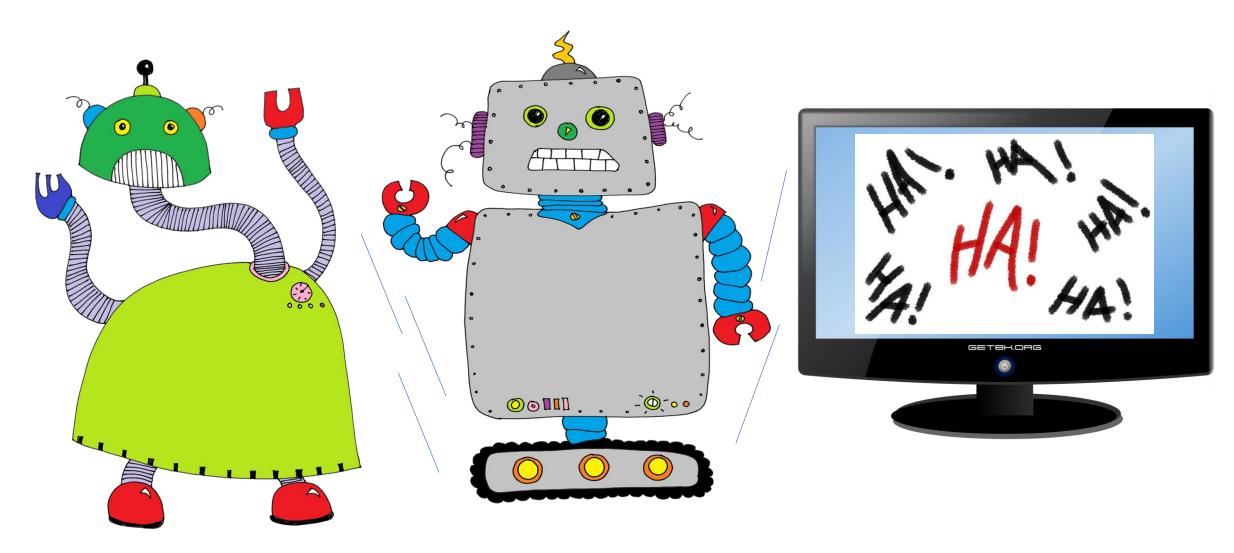

Olive is a very keen photographer (all her eyes are cameras)! She helps you to learn about the acceptable use of photographs and videos and what to do if someone is using your photograph when you don't want them to!

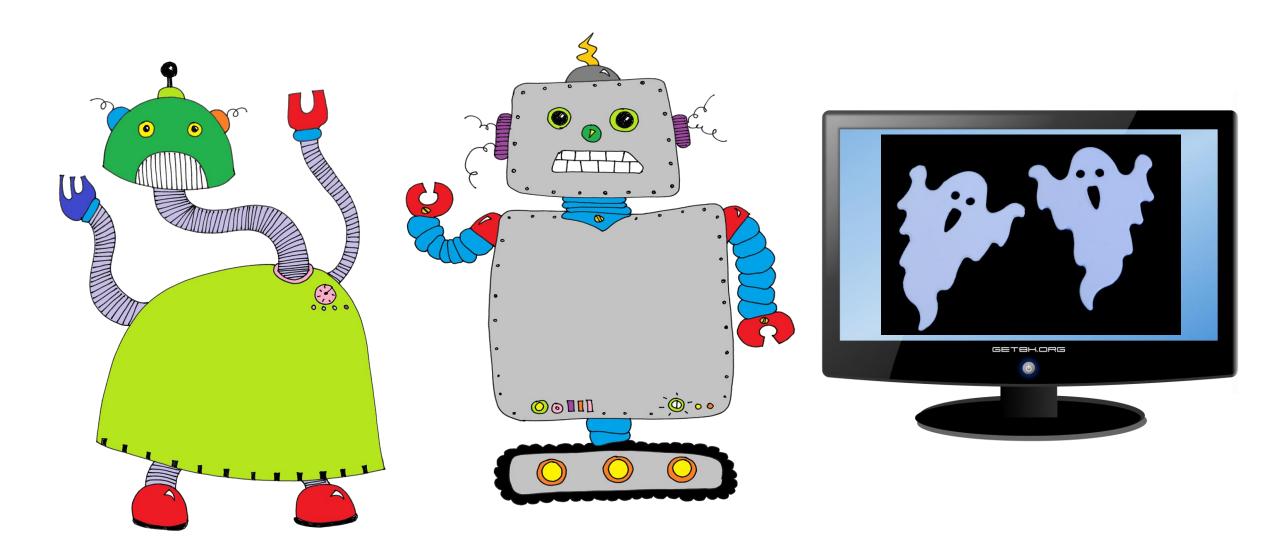

Ted has a built in watch that knows every time zone in the world! He knows how long 'screen time' should be, who you should play with and how old you need to be to play each game. He will teach you that you should not play games that are too old for you!

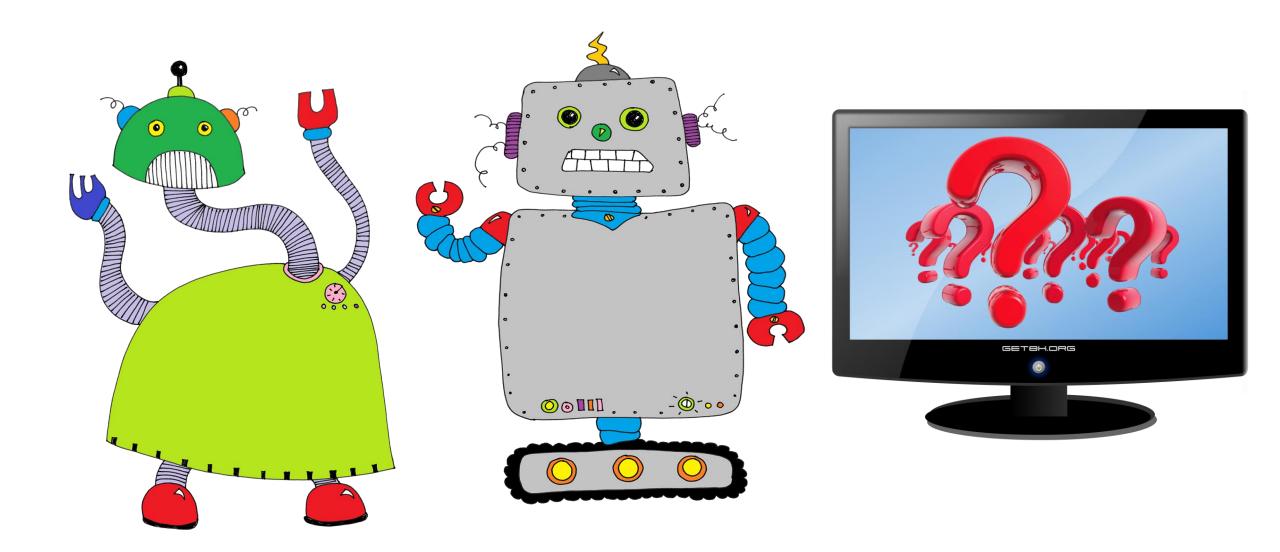

Ted and Betty were watching a video on YouTube for Kids on the television. Without their parents in the room! What are they doing wrong?

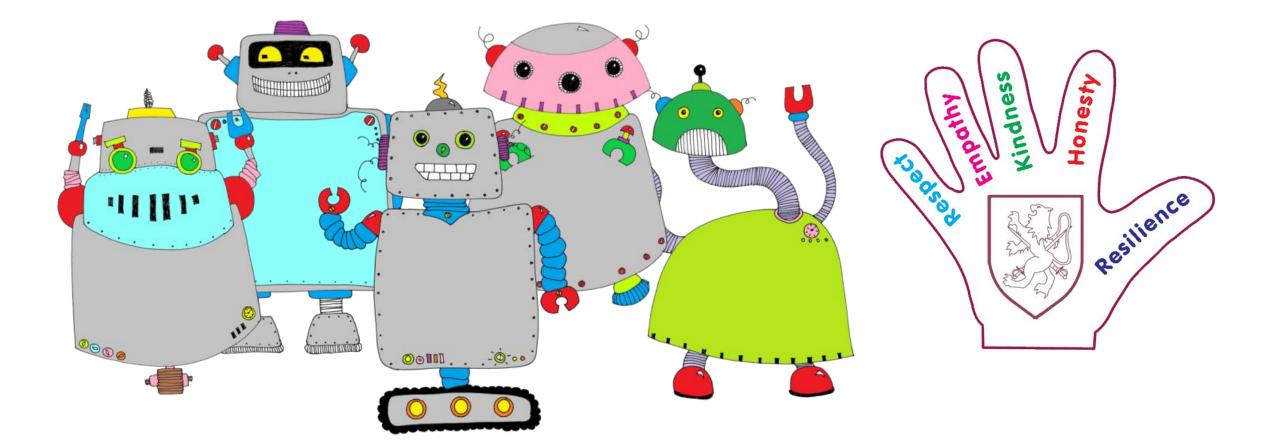

Suddenly the video stopped and a very scary laugh came up on the speakers. It was very loud and frightening; it made Betty jump.

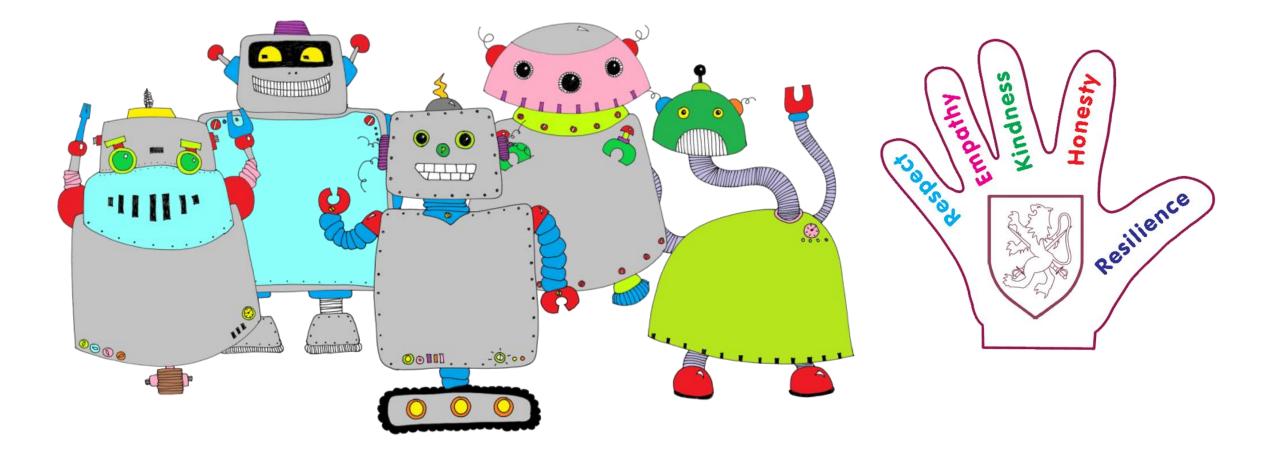

Some scary ghosts appeared on the screen. Ted and Betty were very scared and worried about what they saw.

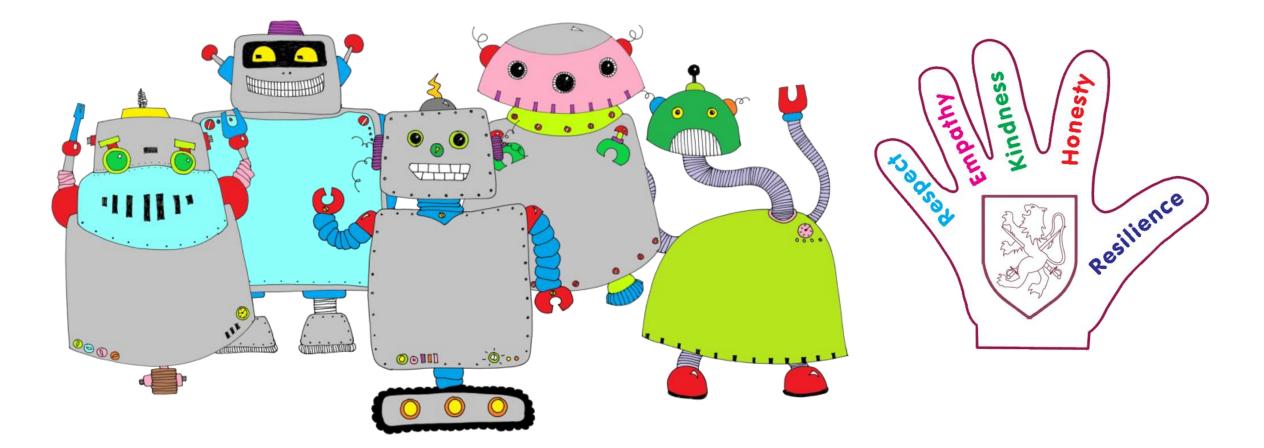

What should they do?

Can you name at least five adults that you can trust?

Always remember to only use things that go online when an adult is the room with you.

If you are ever worried or concerned about anything, always go and tell an adult you trust. They can help do something about it. Never keep a worry inside.
